

Case Study

Client: PowerFleet

Date: November 2020

We design, build, scale, and support exceptional software.

Tarmac designs, builds, scales, and supports exceptional software. We are technology agnostic and leverage a wide array of modern languages like Ruby, Javascript, Python, and Java. We help our clients deliver higher quality software quicker by relying on our proven software development approach, the "Tarmac 10".

PowerFleet's App provided actionable business insights, enabling customers to improve safety compliance, reduce overhead costs, streamline operations, and increase profits.

PowerFleet is a global leader and provider of wireless IoT and M2M solutions for securing, controlling, tracking, and managing high value enterprise assets such as industrial trucks, tractor trailers, containers, cargo, and vehicle and truck fleets.

01

The Challenge

PowerFleet is the pioneer in the use of wireless technology to track, control, and manage high-value mobile assets. They approached Tarmac to develop powerful yard management software.

02

The Solution

Our team developed an app to enable PowerFleet the ability to view asset location in the yard, locate their asset by location, condition, and we gave them the flexibility to set the conditions of their application.
